

1. Product and Company Identification

PRODUCT NAME: DOCETAXEL INJECTION CONCENTRATE
20 mg/mL, 80 mg/4 mL, 160 mg/8 mL Vial (20 mg/mL)

Supplier:

Winthrop U.S.
A business of Sanofi U.S.
55 Corporate Drive
Bridgewater, NJ 08807

24-Hour Transport Emergency, US (Chemtrec):	(800) 424-9300
24-Hour Transport Emergency, outside US (Chemtrec):	(703) 527-3887
US Customer Service	(800) 207-8049
24-Hour Emergency, sanofi-aventis US:	(908) 981-5550

Product use: Pharmaceutical product.

2. Hazards Identification

2.1 Classification in accordance with 29 CFR 1910.1200

Classification:

Flammable liquids, Category 2
Reproductive toxicity, Category 1B
Germ cell mutagenicity, Category 2
Specific target organ toxicity - repeated exposure, Category 2
Effects on or via lactation

2.2 Label elements in accordance with 29 CFR 1910.1200

**Labeling of the finished drug product is not required according to OSHA 29 CFR 1910.1200.
The following information is provided for the product solution:**

Signal Word: Danger

Hazard Statement(s): Highly flammable liquid and vapor. May damage fertility. May damage the unborn child. Suspected of causing genetic defects. May cause damage to organs through prolonged or repeated exposure. May cause harm to breast-fed children.

Symbol(s): Flame; Health hazard

Precautionary Statement(s):

- Prevention: Keep away from heat and open flame. No smoking. Keep container tightly closed. Wear protective gloves and eye protection. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe vapors, mist or spray. Wear eye protection, protective gloves and protective clothing. Avoid contact during pregnancy and while nursing. Do not eat, drink or smoke when using this product.
- Response: In case of fire: use all means (water, carbon dioxide, foam or dry chemical) to extinguish. If on skin or hair: Take off immediately all contaminated clothing. Rinse skin with water. If exposed or concerned: Get medical attention if you feel unwell.
- Storage: Keep container tightly closed. Store locked up. Store in a well-ventilated place. Keep cool.
- Disposal: Dispose of contents in accordance with applicable regional, national and local laws and regulations.

2.3 Hazards Not Otherwise Classified (HNOC)

Not classified.

3. Composition/Information on Ingredients

<u>Chemical Name:</u>	<u>Common Name:</u>	<u>CAS #:</u>	<u>Percentage or concentration range</u>
(2R,3S)-N-carboxy-3-phenylisoserine,N-tert-butyl ester, 13-ester with 5 β -20-epoxy-1,2 α ,4,7 β ,10 β ,13 α -hexahydroxytax-11-en-9-one 4-acetate 2-benzoate, trihydrate	Docetaxel	148408-66-6	20 mg/mL (approx. 2.5 %)
Polyoxyethylene 20 sorbitan monooleate	Polysorbate 80	9005-55-6	0.54 g/mL
Ethyl alcohol	Alcohol	64-17-5	0.395 g/mL (approx. 50%)

4. First Aid Measures

4.1 First aid procedures

Eye contact: In case of contact with product, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lenses if worn. Get medical attention.

Skin contact: In case of contact with product, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if irritation develops and persists.

Ingestion: If swallowed, call a poison center or physician immediately. Do NOT induce vomiting unless directed to do so by a physician. Never give anything by mouth to an unconscious person. Rinse mouth thoroughly with water.

Inhalation: If product is inhaled, remove to fresh air. If breathing is difficult, trained personnel should give oxygen. Get medical attention immediately.

4.2 Most important symptoms and effects, both acute and delayed

The most common symptoms and adverse reactions in clinical trials included infections, neutropenia, anemia, febrile neutropenia, hypersensitivity, thrombocytopenia, neuropathy, dysgeusia, dyspnea, constipation, anorexia, nail disorders, fluid retention, asthenia, pain, nausea, diarrhea, vomiting, mucositis, alopecia, skin reactions, myalgia.

4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically and supportively. Refer to package insert for additional information.

5. Fire Fighting Measures

5.1 Extinguishing media

Suitable extinguishing media: All means: water, carbon dioxide, foam or dry chemical.

Unsuitable extinguishing media: Strong water jet.

5.2 Specific hazards arising from the chemical

Hazardous combustion products: Carbon monoxide, carbon dioxide, oxides of nitrogen.

5.3 Special Protective Equipment and Precautions for Fire-fighters

In case of fire, use full firefighting turnout (bunker) gear and self-contained breathing apparatus (SCBA). Keep personnel upwind and away from fire. Move container from fire area if you can do it without risk. Do not scatter spilled material with high-pressure water streams. Dike fire-control water for later disposal.

6. Accidental Release Measures

6.1 Personal Precautions and Protective Equipment:

Eye protection, respiratory protective equipment, and suitable protective clothing should be worn (see Section 8).

6.2 Emergency Procedures:

Small Spills

If a small spill occurs within a ventilated cabinet, wear protective equipment to prevent inhalation or eye/skin contact (see Section 8). Wipe up spill with absorbent material and place in an impervious container.

Large Spills

During a large spill, evacuate non-essential personnel from the area. Wear protective equipment to prevent inhalation or eye/skin contact (see Section 8). Absorb the liquid with an inert absorbent material (e.g. absorbent pad, clay, vermiculite, etc.). Avoid excessive physical disturbance of spill during cleanup to minimize aerosol generation.

6.3 Methods for containment:

Follow local workplace procedures. Prevent the product from entering the environment. Avoid discharges to sewers, drains, waterways, or onto the ground.

6.4 Methods for clean-up:

Wash the floor with dilute bleach and plenty of water, absorb or retain the cleaning water for disposal. Carefully place the waste in a labeled receptacle for safe disposal as a contaminated waste. Remove any contaminated clothing, personal protective equipment and barrier sheeting, and place in a double sealed, labeled waste container marked for disposal. Wash skin thoroughly after handling.

7. Handling and Storage

7.1 Precautions for Safe Handling

Product should be used in a controlled work area. Use with adequate ventilation (see Section 8). Avoid contact with eyes, skin and clothing. To minimize hazards from accidental breakage or spills of containers and to simplify clean-up, store and transport within secondary containers, pans or trays. Use disposable protective coatings and/or barrier sheeting in use areas where possibility of spillage exists to simplify cleanup. Do not eat, smoke or drink while handling product. Wash hands thoroughly after handling.

7.2 Conditions for Safe Storage

This product should be stored in a closed secondary container that minimizes the risk of breakage. Store between 2°C and 25°C (36°F and 77°F). Retain in the original package to protect from light.

8. Exposure Controls/Personal Protection

8.1 Exposure Limits

Sanofi-aventis occupational exposure limit, docetaxel: 0.001 mg/m³, 8-hour TWA.

Ethyl alcohol: OSHA PEL: 1,000 ppm. ACGIH TLV-STEL: 1,000 ppm. NIOSH REL: 1,000 ppm TWA.

8.2 Appropriate Engineering Controls

General Controls for Clinical Setting

A workplace risk assessment must be carried out in order to determine the correct engineering control measures, work practices and personal protective equipment.

Engineering Controls: Preparation of this product should be done in an area that is devoted solely to the preparation of hazardous drugs and is restricted to authorized personnel. This product should be prepared within a ventilated cabinet designed to protect workers and adjacent personnel from exposure. Transfers from primary packaging such as vials to dosing equipment should also be performed within a ventilated cabinet. Use closed-system, drug-transfer devices, glove bags and needleless systems within the ventilated cabinet. The final prepared product should be sealed in a plastic bag or other sealable container prior to removal from the cabinet. All waste containers in the cabinet should be sealed and wiped prior to removal for disposal.

8.3 Individual Protection Measures

Eye/face protection: At a minimum, safety glasses with side shields should be worn. Wear a face shield to avoid splash incidents involving the eyes, nose and mouth when adequate engineering controls are not available.

Skin protection: Use two pairs of approved chemotherapy gloves with the outer one covering the gown cuff at all times, including when unpacking product shipments. Gloves should be changed every 30 minutes or when torn, punctured or contaminated and discarded immediately in the appropriate container. When working in a ventilated cabinet, the outer gloves should be removed and bagged for disposal inside the ventilated cabinet. Avoid skin contact by using a disposable gown made of non-linting and non-absorbent fabric. The gown should have a closed front, long sleeves and elastic or knit closed cuffs and should not be reused.

Respiratory protection: Respiratory protective equipment can only be used in place of engineering controls as a temporary measure in emergency situations or when control by other means is not feasible. Respiratory protection must be selected according to the risk from the work task or situation. In general, positive pressure, supplied air respiratory protective equipment (hood, half suit or full suit), which provides high factors of protection, is used when there is risk of airborne exposure above recommended exposure levels. All respiratory protection should be in compliance with the OSHA Respiratory Protection Standard, 29 CFR 1910.134, or other regulations applicable to the country of use.

General hygiene considerations: Health care workers who prepare or administer hazardous drugs or who work in areas where these drugs are used should follow specific workplace handling guidelines in order to prevent exposure to these agents in the air or on work surfaces, clothing, medical equipment, or in patient urine or feces. Wash hands with soap and water immediately before using personal protective clothing (such as disposable gloves and gowns) and after removing personal protective clothing, including gloves. Outer gloves and gowns should be removed and bagged for disposal in the appropriate container at the site of administration. The waste container should be double-bagged before removal of the inner gloves. Clean and decontaminate work areas before and after each activity and at the end of each shift. See Section 13 for guidance on waste handling.

Detailed advice can be found in published guidance on the handling of oncolytic and cytotoxic agents. See Section 16.

9. Physical and Chemical Properties

Appearance: Amber colored viscous liquid

Odor: Characteristic alcohol odor.

Odor threshold: No data available.

pH: Approximately neutral (6.5 at 250 g/l in water)

Freezing point: No data available.

Initial boiling point/boiling point range: No data available.

Flash point: 14 °C (57 °F)

Evaporation rate: No data available.
Flammability: No data available.
Upper/lower flammability or explosive limits: No data available.
Vapor pressure: Not applicable.
Vapor density: Not applicable.
Specific Gravity: 0.95
Solubility in water (docetaxel): approx. 0.002 g/l (practically insoluble)
Solubility in ethyl alcohol (docetaxel): 100 g/l (soluble)
Partition coefficient: n-octanol/water (docetaxel): Log Kow = 3.2
Auto-ignition temperature: No data available.
Decomposition temperature: No data available.
Viscosity: No data available.

10. Stability and Reactivity

10.1 Reactivity

Not a reactive material under normal handling conditions.

10.2 Chemical Stability

Stable under normal handling conditions.

10.3 Possibility of hazardous reactions

None known.

10.4 Conditions to Avoid

Keep away from heat, sparks and flames.

10.5 Incompatible materials

Strong oxidizing and reducing agents.

10.6 Hazardous decomposition products

Carbon monoxide, carbon dioxide, oxides of nitrogen.

11. Toxicological Information

The following information is for the active ingredient docetaxel unless otherwise noted:

Information on likely routes of exposure: Not expected under normal handling conditions. Unintended spills or releases could result in exposure to eyes, skin and respiratory tract.

Symptoms related to the physical, chemical and toxicological characteristics: The most common symptoms and adverse reactions in clinical trials included infections, constipation, anorexia, nail fluid retention, asthenia, pain, nausea, diarrhea, vomiting, mucositis, alopecia, and skin reactions.

Effects of short-term (acute) exposure: The most common effect seen in clinical trials included neutropenia, anemia, febrile neutropenia, hypersensitivity, thrombocytopenia, neuropathy, dysgeusia, dyspnea, anorexia, nail disorders, asthenia, and myalgia.

Effects of long-term (chronic) exposure: May be carcinogenic due to the pharmacological activity. If the compound is bioavailable via the route of exposure and exposure occurs for prolonged periods of time, due to the pharmacological activity it is presumed that potentially adverse and irreversible effects could occur, including limited carcinogenic and reprotoxic effects.

Acute toxicity (LD50):

Oral route, rat: > 2,000 mg/kg

Dermal routes, rat: > 2,000 mg/kg

Skin corrosion/irritation: Not a skin irritant.

Serious eye damage/irritation: Irritating to the eyes.

Sensitization: Not a skin sensitizer.

Specific target organ toxicity – single exposure (STOT-SE): No data available.

Specific target organ toxicity – repeated exposure (STOT-RE): Causes damage to organs through prolonged or repeated exposure.

Carcinogenicity: Carcinogenicity studies with docetaxel have not been performed.

Not listed by NTP, not found to be a potential carcinogen by IARC or OSHA.

Reproductive toxicity and teratogenicity: Docetaxel did not reduce fertility in rats when administered in multiple intravenous doses of up to 0.3 mg/kg (about 1/50th the recommended human dose on a mg/m² basis), but decreased testicular weights were reported. This correlates with findings of a 10-cycle toxicity study (dosing once every 21 days for 6 months) in rats and dogs in which testicular atrophy or degeneration was observed at intravenous doses of 5 mg/kg in rats and 0.375 mg/kg in dogs (about 1/3rd and 1/15th the recommended human dose on a mg/m² basis, respectively). An increased frequency of dosing in rats produced similar effects at lower dose levels.

Based on its mechanism of action and findings in animals, docetaxel can cause fetal harm when administered to a pregnant woman. Studies in both rats and rabbits at doses ≥ 0.3 and 0.03 mg/kg/day, respectively (about 1/50 and 1/300 the daily maximum recommended human dose on a mg/m² basis), administered during the period of organogenesis, have shown that docetaxel is embryotoxic and fetotoxic (characterized by intrauterine mortality, increased resorption, reduced fetal weight, and fetal ossification delay). The doses indicated above also caused maternal toxicity.

Mutagenicity: Docetaxel was clastogenic in the in vitro chromosome aberration test in CHO-K1 cells and in the in vivo micronucleus test in mice administered doses of 0.39 to 1.56 mg/kg (about 1/60th to 1/15th the recommended human dose on a mg/m² basis). Docetaxel was not mutagenic in the Ames test or the CHO/HGPRT gene mutation assays.

Aspiration hazard: No information available.

Information for the ingredient Polysorbate 80:

Acute oral toxicity LD50 (rat): 25,000 mg/kg

Irritation: Mild eye irritant. Mild skin irritant.

Information for Ethyl alcohol:

Acute oral toxicity: LD50 (rat): 7,060 mg/kg

Acute inhalation toxicity: LC50 (rat, 4 h): 95.6 mg/l

Acute dermal toxicity: LD50 (rabbit): > 20,000 mg/kg

12. Ecological Information

The following information is for the active ingredient docetaxel unless otherwise noted:

12.1. Ecotoxicity

Toxicity on invertebrates: > 3.3 mg/l

Species: Daphnia

Exposure duration: 48 h

Non-toxic at the solubility limit in the test medium.

Bacteria toxicity (EC50): > 100 mg/l

12.2 Persistence and degradability

Biological degradability: 0 – 4.9 %

Testing period: 28 d

The product is not readily biodegradable according to OECD criteria.

12.3. Bioaccumulative potential

No data available.

12.4 Mobility in soil

No data available.

12.5 Other adverse effects

Chronic aquatic toxicity, Category 3. Harmful to aquatic life with long lasting effects.

13. Disposal Considerations

13.1 Disposal of product waste

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements. Based on the ethanol concentration and flash point the product may be considered a RCRA characteristic waste (D001). Wastes should be double contained (e.g. double sealed bags) and labeled indicating contents to ensure safe handling and disposal. Incineration of waste product is recommended.

13.2 Disposal of packaging waste

Dispose of in a safe manner in accordance with federal, state and local environmental regulations. Empty packages, containers or liners may contain product residue.

14. Transport Information

14.1 Basic shipping information, finished product

U.S. DOT	UN1170, Ethanol solution, 3, II
ICAO/IATA	UN1170, Ethanol solution, 3, II
IMDG	UN1170, Ethanol solution, 3, II

Due to the small amount of product per vial, local regulation may provide for various exceptions.

15. Regulatory Information

US Regulations

CERCLA Hazardous Substance List (40 CFR 302.4): Not listed.

Clean Water Act Section 311 Hazardous Substances (40 CFR 117.3): Not listed.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130): Not listed.

SARA Title III:

Section 302 Extremely Hazardous Substance (40 CFR 355, Appendix A): Not listed.

Section 313 Toxic Release Inventory (40 CFR 372): Not listed.

State Regulations

California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65): Not listed.

Massachusetts Right-To-Know List: Not listed.

New Jersey Right-To-Know List: Not listed.

Pennsylvania Right-To-Know List: Not listed.

16. Other Information

Docetaxel is included in the NIOSH List of Antineoplastic and Other Hazardous Drugs in Healthcare Settings, 2016.
